

Temperature-Controlled Transportation,
Warehousing, Distribution and Packaging Services

capabilities

RLS Logistics is one of the region's leading third-party logistics providers offering superior temperature-controlled transportation, warehousing, packaging and distribution services. From our three locations in the Northeast, we provide a single source for transportation, warehousing, distribution and fulfillment needs. **Customers include:** refrigerated and frozen food processors, importers and marketers, food service distributors, supermarket chains and shopping clubs.

REGIONAL TRANSPORTATION

Our regional transportation program can handle shuttle services to and from your facilities to RLS. We provide drayage services to and from all regional ports. Along with our national distribution and warehousing, this ensures a complete turnkey logistics solution. We can also handle any raw materials that are inbound to your facility within the Northeast.

- Drop trailer programs
- Shuttle service to and from your facility
- Professional experienced drivers
- Company owned fleet of modern equipment
- Low claim experience
- Dedicated fleet service
- Satellite tracked equipment

WAREHOUSING

We offer three comprehensive facilities in the region with frozen, cooler and dry warehousing space. Modern, safe and secure, our computerized facilities are highly energy efficient and cost-effective for material handling. We are routinely audited by the AIB International. Warehouse management systems provide real-time inventory control, just-in-time order management, productivity tracking and customized reporting. Dedicated warehousing services are available to customers looking for a customized facility tailored to their specific needs.
